Sell Insight Suite under your own brand.

An all-in-one business platform your clients run in the cloud or on their own server. You set the price, install it, and own the relationship.

01 · WHAT YOU SELL

One platform. Sales & CRM, point of sale for retail and restaurants, inventory & purchasing, finance, HR & payroll, help desk ticketing with SLAs and auto-escalation, and security & compliance.

Industry modules. Construction, manufacturing, chemical & industrial, trading & brokerage firms, and Japan installations with a Japanese interface and Japanese compliance.

02 · PARTNER BENEFITS

Your brand, not ours

Clients see your name, logo and support contact in the app, on the setup page and in every email.

You set the price

We invoice you per install, billable only once its install link is used. You bill your client.

Paid install work

A standard install takes about an hour on-site, on Linux or Windows, from one generated link.

A partner portal

Create customers, submit work orders, generate install links, track setup and reach our support.

03 · WHY CLIENTS BUY

One install, one login, no per-module upsell. Runs in the cloud or self-hosted, with an optional fully air-gapped mode. Connects to QuickBooks, Gusto, ADP, BambooHR, Paychex, UPS and FedEx, with integrations available for Acumatica, Business Central, Sage Intacct and Xero.

04 · GETTING STARTED

Built for

IT firms & MSPs
POS dealers
ERP consultants
Low-voltage & install companies

How to start

1 Intro call and live demo
2 Sign the reseller agreement
3 Portal access and installer training
4 Sell, install and earn
